Grain Sampling Instructions:

Equipment required:

- Buckets or bins to collect the grain, labelled with the field name
- A marker pen to label the bags with.
- Zip seal bags (like freezer bags or such like)
- A jug or cup to take samples from tipping trailers

Sampling Instructions:

1. Using the jug, take 2 samples from each load as the grain trailer is tipped into the grain intake point at different points of the tipping, for example at 1/3 and 2/3 through tipping. Empty in the bin or bucket.
2. After the last trailer of the field is tipped, carefully mix the grain in the bucket.
3. Take a subsample of about 200g (roughly a coffee mug full) and put it in the freezer bag.
4. **Write the sample name or sample ID on the freezer bag**.
5. Fill in the sample form by clicking on the link below:
   https://hillcourtresearch.co.uk/grain-analysis-sample-form/
6. Click "submit" to send the data to the laboratory and "Print" to print the form.
7. Put the form with the samples in an envelope or box and post to:

   Post to: Hill Court Farm Research Ltd
   Frogsmarsh
   Corse Lawn
   Gloucester
   Glos. GL19 4PW
8. Postal collections can be arranged by clicking on the link below:
   https://send.royalmail.com/
9. If a courier was added at checkout, a collection can be arranged by filling in the Courier Booking Form below no later than by 16.00 the day before you require a collection.
